

## [#PIL](#) Co-President Lars Kastrup Visits Seafarers on Kota Cempaka

PIL cares for its people, both onshore and offshore. Our [#seafarers](#) are weathering through trying times. We value their resilience and commitment. Mr. Lars Kastrup, Co-President and Executive Director, PIL, had a chance to visit the crew on board Kota Cempaka recently when the ship called at PSA's Brani Terminal in Singapore.

Accompanied by Mr. Goh Chung Hun, General Manager, Fleet and Capt. Peng Chu Xing, Head of Quality, Safety and Security, Mr Kastrup met with the ship master Capt. Wang Li Cheng, Chief Engineer Mr. Li Jianfa, and the crew. They also went on a tour of the vessel.

"This was my first visit to a PIL vessel, so this was very special to me. I had a good chat with the Master and crew, and they showed keen interest in telling me about their journeys, views and insights on safety, operations, and welfare, and they contributed good recommendations. I'm greatly encouraged by the enthusiasm and commitment of our crew on Kota Cempaka which represents the entire fleet and crew of PIL. Our priority remains to ensure the well-being, safety and security of all our seafarers," commented Mr Kastrup.

PIL will be rolling out more initiatives in the coming months aimed at enhancing the welfare of our seafarers. We hope that through such measures, we can provide good support to our crew as they continue to ride the waves with confidence and pride.
