Reinforcing our commitment to China and beyond!

2 May 2024

 As part of PIL's continual commitment to China, PIL China recently held their annual business meeting on 25 – 26 April at their head office in Shanghai to discuss on strengthening our presence in China and better meeting our customers' evolving demands. This business meeting was also the first for Anderson Luo in his capacity as the Managing Director for PIL China since his appointment last year.

 PIL CEO Lars Kastrup, Executive Chairman Mr S.S. Teo, and colleagues from Head Office also attended this event. For the first time, PIL China has expanded the session to include all Regional Heads, so that the team could have a diverse and global outlook as they collectively set a new strategic direction for PIL for the year ahead.

 During this two-day meeting, the teams got the valuable opportunity to learn from the different regional offices, as they exchanged business insights and shared best practices. Through such cross-learning between the different teams, our colleagues were able to bring back a fresh perspective as they work towards constantly improving their solutions for our customers!

 This business meeting is testament to how PIL is People-Centric as we commit to regular engagements and dialogues among colleagues around the world. It also demonstrates how PIL is Pushing Boundaries by providing a platform to encourage our teams to think out of the box. Embracing innovative new ideas and a new way of thinking, we are firm on "Driving Connectivity" for our customers with new approaches and better solutions!
