## **PIL introduces intermodal services to strengthen connectivity**

In line with its drive to enhance connectivity for customers, Pacific International Lines (PIL) is pleased to introduce the PIL Intermodal Services, which offers train, truck and barge services to complement its container shipping services. The PIL Intermodal Services are available across PIL's existing network in Intra-Asia, Africa, Middle East, Latin America and Oceania.

The aim of the new intermodal services is to empower customers by providing them with more options of how they would like their cargoes to be transported. Customers can choose to save time and resources in managing their cargoes by entrusting PIL to provide transportation services from the points of origin to the final destinations, or they could opt to arrange their own last-mile transportation. PIL's intermodal solutions are also highly customisable with dedicated train and barge services.

Mr Lars Kastrop, CEO, PIL, said, "We have seen growing market demand for intermodal services in recent years. With our strong network of global offices, agencies and partners, we are able to offer good point-to-point connectivity across sea and land for our customers. Our intermodal solutions will be well supported by our digital services including electronic Bill of Lading, and in the near future, GPS tracking. This solution is also aligned with our goal to reduce the overall carbon footprint of our operations and that of our customers."

The PIL Intermodal Service is now available in Africa, Australia, Cambodia, Guatemala, India, Malaysia, Mexico, New Zealand, Saudi Arabia, Thailand and China. PIL plans to roll out its intermodal service to other parts of the world in the near term."

For more information on the PIL Intermodal Services, please contact PIL's local sales representatives.

The list of PIL's local sales representatives can be found at [www.pilship.com](http://www.pilship.com).
