PIL launches Yiwu-Ningbo block train service in China

PIL is forging ahead in delivering its new intermodal services. Following the first block train service in Thailand, PIL has successfully launched another block train from Yiwu to Ningbo in China. In collaboration with Zhoushan Port Group, 50 units of 40-footer high-cube containers were transported over rail from Yiwu Inland Container Depot for 300km, before reaching its final destination at Ningbo-Zhoushan Port. Currently, PIL has 20 weekly container shipping services operating out of the port of Ningbo.

With China being a key market for PIL, the successful launch of the sea-rail intermodal solution will further strengthen PIL's service offering by providing our customers with an integrated and more stable transportation channel for their final mile requirements. Looking ahead, PIL will progressively launch more intermodal services in China.

Leveraging on its wide network, PIL offers its intermodal service in Asia, Africa, Middle East, Latin America and Oceania. This solution aims to support customers in their journey to reduce carbon emissions as well as to achieve PIL's goal to be a sustainable shipping line.
