PIL renews support to youths in Kenya

Following the contribution of three containers in 2022, PIL is renewing its support to the Tana River Life Foundation (TLRF) in Kenya with additional contributions of containers in 2023. In January, PIL provided two containers for the use of TLRF to ship used school furniture donated by schools in Singapore to schools set up by TLRF for children and youths living in the Tana Delta in Kenya.

PIL has been working with TLRF since 2015. It is a private charitable trust founded by Malaysian Gabriel Teo in December 2005, before being registered as an NGO in Kenya in 2007. It aims to holistically develop an individual's academic and vocational skills so as to improve the individual's quality of life, thereby raising the living standard of the community. The main beneficiaries of the TRLF are marginalised communities residing in Tana River and Lamu Districts of the Coast Province of Kenya. These include AIDS orphans, children of subsistence farmers and nomadic pastoralists, and single parent families without any regular source of income.

PIL is committed to continue supporting this meaningful cause of empowering the lives of communities in Africa.
