Plugging into dialogues about food security in Egypt

As a leading container shipping line, PIL is committed to contributing to ensuring a reliable and sustainable food supply chain in regions where PIL has a presence in. For this reason, PIL participated as an exhibitor for the first time at the 29th Arab Fertilizer Association (AFA) International Annual Fertilizer Conference in Cairo, Egypt, which took place between 21 and 23 February 2023.

Leonard Roberts, Country General Manager, PIL Egypt commented, “The conference was useful for PIL, as we could glean relevant information from experts and industry participants from across the Middle East region on a variety of topics, including agriculture, logistics supply chain and sustainability. We also took the opportunity to interact with industry representatives and highlighted how PIL could support with our connectivity across Asia, Africa, Middle East, Latin America and Oceania. Importantly, we also learnt about the key topic of decarbonising the fertilizer industry and would seek ways to contribute.”
