Successful delivery of special tanker trailers from Nansha to Port Kuching

Testament to its operational efficiencies and capabilities, PIL has successfully delivered a special cargo of two tanker trailers with TSD flat racks from Nansha, China to Port Kuching, Sarawak, East Malaysia on 11 April 2023.

It was a specialised operation involving loading and unloading of the tanker trailers over two vessels. The shipment was first loaded on PIL's Kota Gaya departing Nansha on 27 March 2023 and arriving in Singapore on 1 April 2023. The tanks were then transferred to Kota Dunia on 9 April 2023 departing Singapore for Port Kuching. On 11 April 2023, the tanker trailers were discharged safely and smoothly at Port Kuching, Sarawak.

Tanker trailers are specialised cargo which are unable to fit inside a conventional container, and they are used to transport materials such as liquids and gasses.

PIL is happy to have been able to support its customer in the timely delivery of this special shipment, as it stands ready to offer more customers this special service which aims to provide customised care to unconventional cargo such as break bulk, Out of Gauge cargo and Project Cargo on an "end-to-end" basis. This is in line with PIL's aim of Driving Connectivity and meeting the changing needs of its customers.
