Women in PIL can make an impact in maritime

Today, 18 May 2023, is the International Day for Women in Maritime. To all women in maritime, PIL conveys its appreciation and admiration to you for contributing to the growth and development of the industry. At PIL, our women are also working hard each day, aiming to play a role in shaping the future of maritime. PIL is pleased to feature in a short video, nine such ladies at its Singapore Head Office, whose professionalism and dedication to their jobs are making an impact on PIL and the maritime industry.

Happy International Day for Women in Maritime!
