Recognising PIL women around the world

On this International Day for Women in Maritime (18 May 2023), PIL would also like to recognise the many women in its overseas offices and agencies globally, who support PIL in serving its customers in over 500 locations in more than 90 countries worldwide. The short video shown here is a tribute to these ladies who play important roles in the smooth functioning of PIL's operations in wherever it serves.

Happy International Day for Women in Maritime!
