### **PIL's first intra-Asia breakbulk shipment!**

PIL recently made our first successful intra-Asia delivery of a breakbulk shipment using our container vessel! Arriving in Singapore from Port Klang, Malaysia on 21 July, this huge cargo was loaded on a bed of six 40-foot flat rack rows on board. Can you make a guess what was this cargo?

This shipment fully showcased PIL's operational capabilities and efficiencies to transport unconventional cargo such as breakbulk and other special project cargo, beyond just containers. With this successful delivery, PIL reaffirms our commitment of "Driving Connectivity" and meeting the evolving needs of our customers by enhancing our service offerings!
