## **PIL further expands intermodal services to boost connectivity for customers**

27 November 2023

PIL is pleased to boost connectivity for our customers with the further expansion of our PIL Intermodal Services, which include train, truck and barge solutions to complement our container shipping services.

The PIL Intermodal Services has now been expanded to cover Indonesia, Myanmar, and Pakistan! This is on top of our existing intermodal services network across Africa, Australia, Bangladesh, Cambodia, China (including Taiwan), Guatemala, India, Malaysia, Mexico, the Middle East, Mongolia, Nepal, New Zealand, South Korea, Thailand, and Vietnam.

In addition, we have also augmented our current intermodal service offerings in Africa, China, Guatemala, India, Mexico, New Zealand, South Korea, Thailand, and Vietnam by including new destinations within these regions.

The expansion of PIL Intermodal Services is testament to PIL's commitment of "Driving Connectivity" for our customers! By enhancing our point-to-point connectivity, customers can save more time and resources when delivering their cargoes through our one-stop end-to-end transportation solution. With more options to deliver their cargoes efficiently and flexibly, customers are also empowered to reduce the carbon footprint of their overall supply chains! 🌱
