Did you know that PIL can also ship unconventional cargo such as breakbulk and project cargo?

12 January 2023

💡🏢 Did you know that PIL can also ship unconventional cargo such as breakbulk and project cargo?

🏢 Recently, PIL transported such cargo on our vessel Kota Cahaya. Each measuring 7.6 metres in diameter and weighing about 35 tonnes, these giant curved structures are called dish heads, which are important components used to make pressure vessels, storage tanks, and boilers. During their journey from the UAE to Saudi Arabia, the dish heads are securely lashed to ensure their safe transportation.

🌐 This successful delivery demonstrates how PIL is "People-Centric" in going the extra mile to provide solutions for our customers! With our operational capabilities to transport beyond just containers, we can reaffirm our commitment of "Driving Connectivity" to meet the various needs of our customers!
