## PIL and MatchBox Exchange collaborate to optimise flow of empty containers in Thailand

6 February 2023

 Pacific International Lines and [MatchBox Exchange - Container Logistics](#), a SaaS platform for the reuse and exchange of shipping containers between operators, have teamed up to enhance landside logistics for PIL's customers in Thailand. This collaboration expands a similar partnership between PIL and MatchBox Exchange in Malaysia that began in 2023.

 PIL's customers in Thailand now have access to the MatchBox Exchange platform to seamlessly triangulate import containers for export with instant 24/7 approval. Triangulation involves reusing import containers for exports, reducing the need to transport empty containers to and from depots. The collaboration enables PIL's customers to improve turnaround times, reduce trucking kilometres and carbon emissions, and avoid unnecessary trips to the depot.

 Founded in 2017, MatchBox Exchange's platform matches those who have a supply of empty containers with those who need them, to enable customers to conveniently reuse containers, or request or offer empty containers across businesses for their import or export needs.

 [Chee Wei LIM](#), General Manager, Logistics Division, PIL, said, "With MatchBox Exchange's innovative solution, we can help our customers minimise their environmental footprint, while meeting PIL's own objectives of driving a sustainable future as an efficient and future ready shipping line."

 By leveraging the services provided by MatchBox Exchange, PIL reaffirms its commitment towards achieving net zero by 2050 by offering better and cleaner solutions for its customers.
