## Advancing Maritime Resilience with People-Centricity

7 Mar 2024

💡👤 PIL CEO Lars Kastrup recently shared his thoughts on “Just Transition” in a panel discussion at the recent “Advancing Maritime Resilience: No One is Left Behind” seminar. Organised by Singapore Maritime Officers' Union / Wavelink Group, this seminar aimed to reinforce shared responsibility, empower the maritime workforce through training, and champion sustainability without disadvantaging stakeholders.

👤🏢 During the panel discussion, Lars pointed out that despite the practical challenges for women to become seafarers, we may still be able to attract more women -- especially the younger ones -- to join this career if the maritime industry could create a more conducive working environment and career path.

❤️🌐 With people at the heart of the PIL family, we value diversity and firmly believe in fairness for all. PIL is committed to ensuring the growth and well-being of all our seafarers regardless of gender, and we look forward to the maritime industry adopting the same “People-Centric” mindset in steering the sector towards resilience and sustainability! 🗣️🔗
